

Kinder zine

A kaleidoscope of childhood

Adyan Ahmed M and Usman Riyaz

Every week, a learner is selected to be the Star of the Week. Each day of the week will consist of an exciting event or activity to honour him or her. This was a memorable week for Adyan and Usman as they were celebrated and honoured.

Book Buzz

Pepper goes to School

This is a Pepper series that has beautiful illustrations and easy language, which makes it interesting for the tiny tots to relate to their daily routine as they begin coming to school. Pepper is a young pup who goes to school, makes friends and faces situations just like our children do.

Book Review: The scenarios are nicely crafted and ends in the best resolution.

Pepper Goes to School

Standing Line

Sleeping Line

Early Literacy Activity

Writing starts with scribbling and drawing, then moves on to forming letters and words. It is a complex skill that develops over time. Learning strokes ensures that the child starts to recognize the strokes that make up new letters that they encounter. Standing Lines and Sleeping Lines were introduced to the students with activities like rava tracing, clay play, writing in the air and so much more.

Early Numeracy

Children love counting and it's important that children's get used to numbers as these lead on to other mathematics skills. Our little tots can identify number 1 and associate value with the corresponding number. They now independently trace number 1.

Learning shapes not only helps children identify and organize visual information, it helps them learn skills in other curriculum areas including reading, math, and science. The Little tots are able to trace and name the shape 'circle.'

Shape Circle

Number 1

EVS

My Name

When children learn something on their own, they gain a sense of ownership for their work. Self-learning is an important skill for children as they journey through education and beyond to adulthood, building independence. Name play in school also has many cognitive benefits which include the ideals that recognizing one's name helps them feel important. Children eagerly awaited their turns to tell their names to their friends and learnt that each had a name very different from the rest of course there were some who shared names. They also learned about the different body parts and their uses.

Art and Craft

Father's Day activity

Art and craft is so much fun! It also improves the eye-hand coordination. This is an important skill as it strengthens the fine motor muscles and helps the students develop better control. Children made ties for their dads, learnt finger dabbing. Leaf printing also allowed the children to explore and experiment with different size and shape of leaves that grow in the vicinity. They were thrilled by the unique prints that each leaf left behind in their books.

My First Colouring

Warm up Exercises

PE

Sports give a child the chance to learn about being part of a team, winning well and bouncing back from a loss. Sports also teaches children about how important it is to work hard, even if this doesn't always mean winning. It is important to remember that the attitude and behaviour taught to children in sports carry over to adult life. Our students have a well planned sports sessions in their schedule which caters to playing, participating and acknowledging success of self and others. We build the sportsmanship spirit very early.

Music and Movement

Music and movement help children develop skills such as cognitive growth, problem-solving, self-expression and social development. A child's learning is incomplete without music and movement in early childhood education. Hence, our learning environment is loaded with these.

Montessori

Beginning at an early age, Montessori nurtures order, concentration, and independence. Intentional classroom design, materials, and daily routines support the student's ability to educate one's self, and to think about what one is learning. Exercises of practical life like rolling and unrolling a mat, carrying a tray was introduced to the children. Developing life skills at an early stage enhances strong foundation for the future.

Father's Day

Theme: Father's Day Participants: Students of Kindergarten Date: 19-06-2023

The event was celebrated to make students understand the important role their dads play in their life, and also to make them aware of the efforts the male parent takes in fulfilling their roles and responsibilities towards the family. Most importantly to let them know they are loved! The kindergarteners celebrated Father's Day with special Invitee dads whose children happened to be the Star of the Week. The proud fathers of the Star children came well prepared with variety of activities like magic tricks, picture reading, storytelling and rhymes to share with the students. They were welcomed and introduced by the class teachers after which the fathers took centre stage to create memorable moments. The Fathers also received a special Crown and chocolate bouquets, creatively presented by the Coordinator Ms Sofiya J and her Team.

The Fathers cherished this special morning and wished that such priceless moments continue to fill their lives for eons to come. They were indeed thankful to Presidency for creating opportunities and weaving magical moments in their lives.

Environment Day

Theme: Environment Day

Date: 13-06-2023

A special assembly was conducted by the kindergarten wing of Presidency RT Nagar campus to celebrate World Environment Day which is observed on 5th June every year. This year the Kindergarten created their own Rose Garden which they will tend and nurture to full bloom.

This assembly aimed at creating an awareness about World Environment Day and ideas to protect and save the Environment. The assembly concluded with a foot tapping dance performance with beautiful props conveying the thematic message.

International Yoga Day

Theme: International Yoga Day

Date: 21-06-2023

To add colour and vibrancy to the Yoga event, the students of kindergarten were dressed up in white attire, rolled out their colourful yoga mats on the school assembly area and began showcasing their flexibility and nimbleness. The event started with a warm up session. Various Yoga exercises and poses were demonstrated under the watchful eyes of the school Yoga teachers Ms. Sunita and Ms. Triveni. The closure had the campus in absolute silence as all were lost in meditation. Children enjoyed the International Yoga Day celebrations while they learned about different yoga poses and exercises and how each can help in their physical and mental well-being.

Eric Carle Birthday

Theme: Eric Carle's Birthday Date: 26-06-2023

The Puppet Theatre at the Presidency School, R T Nagar Kindergarten Wing came alive with Eric Carle's From Head to Toe. The little tots were all enthused as they saw the stage set for the show. The Puppet Theatre – the land of imagination where all characters literally come to life was awaiting the tots who had a glint of expectations and excitement in their eyes. The artistic set up, the character puppets, the voice modulation by the Voice Over by Ms Anitha who produced all of the narration and voices for the characters made the whole experience enigmatic. Puppetry for us is one of the pedagogical processes to educate the students and stimulate in them the artistic creativity to develop their explorative and observation skills. Eric Carle's' From Head to Toe was an experience for all. The story line was well woven through the presentation as students learnt the body parts in a fun-filled way. The animal characters predominantly zoo animals, thrilled the tots as they were introduced to wriggling of hips and kicking of legs, of course with no intentions to harm!

What a day to reckon with!
